the Fifth and Ninth Year of the Reign of
King GEORGE the Third,

WHEREIN is CONTAINED

By MESONICUS.

We rise from Hope's ascending Heav'n will show,
With Strength of Mind, and tread the Skies above;
And penetrate, with an intense Light,
Those upper Depths which Nature hid from Sight.
Thence we will be to walk along the Sphere
Of shining Stars, and travel with the Year;
To leave this heavy Earth, and fetch the Winds
Of Aolus, who bridles the heav'nly Weight,
To look from upper Light, and thence survey
Mortal Affairs wand'ring from the Way.

HALIFAX, Printed and Sold by A. HENRY.

NATURE THE BEST PHYSICIAN.

IN Bladud's old City, surrounded by Hills,
Where the Fount always heals, but the Physic oft kills,
Lives a fam'd Jewish Doctor (not one of the Rabbies)
But a Medical Doctor, esteem'd by the Tabbies;

Who to be in Faſhion took to him a Wife,
That firſt of all Evils or Bleſſings of Life:
So well were they match'd, that if rightly I ween
Like a Couple of Rabbits, one fat and one lean.

The Law and Levitical Rites, it is ſaid,
Enjoin the *Femmes Couvertes* to ſhave all the Head.
To a beautiful Jeweſs how hard is the Fate!
For her long flowing Ringlets to adopt a falſe *Tete*.

But of Beauty enchanting our Dame could not boaſt;
No Glaſs overflow'd with her Name as a Toaſt:
Though no Charms her hard Features were form'd to expreſs,
Yet her Head was a Proverb in Luſtre of Dreſs;
When friz'd to Extent, with her Jewels adorning,
Appear'd like a Buſh in a dew-ſprangled Morning.
Thus dizen'd and ſtiffen'd ſhe came from a Ball,
Where Lords, Rogues, and Pimps, from the great to the ſmall,
With a ſmall Squad of Virgins, and many a Harlot,
Met to dance, play, and chatter, in Honour of Charlotte.

The poppy-crown'd God had not long clos'd their Eyes
Ere the Doctor's Profeſſion oblig'd him to riſe.
"Poor old Sir John Dory is at his laſt Breath,
If your Skill, my good Doctor, can't bail him from Death."
In great Haſte and Darkneſs he cover'd his Pate,
Not with his own *Major*, but his Wife's ſhining *Tete*,
And thus ſallied forth—"Oh! I fear 'tis all hollow
(Quoth the Doctor) good Nurſe, for Sir John cannot ſwallow."

At a Sound ſo terrific the Knight rais'd his Eyes,
And view'd with Amazement the opening Skies.
Bold Fancy ſoon led him from Matter terreſtrial,
Through Regions of Space, to the Archives celeſtial.
Here were Suns, Moons and Comets—the lacteal Way—
And the Zodiack arrang'd in the brighteſt Array:
But here ſhe forſook him—the Illuſion was fled,
And he found his Eyes fix'd on the Jew's frizzled Head.
Convulſions of Laughter the dying Knight ſeis'd;
The Quinſy was broken—the Patient was eas'd.
"Good Morn (quoth the Knight) ſee how Nature ſurpaſſes
All the Skill of your College, and proves you but Aſſes."

SEEING.

THE Eye, ſurpriſing Inſtrument of Light!
Within whoſe Orb reflected Rays of Light
Tranſcribe the Image of external Things,
And Notice to the Mind immediate brings,
From the vaſt Range of diſtant Stars and Skies,
And various beauteous Landſcapes as they riſe.

HEARING.

NOR less than God! planted the curious Ear,
Whose winding Porch collects the trembling Air,
Sonorous Cave! from Bends and Hollows come
The speaking Echoes on the Sounding Drum,
Where living Cords impress the ready Mind,
And raise the Man above the brutal Kind.

FEELING.

THE Senſe of Feeling on the Frontiers Stands,
With Scouts and Guards on Fingers ends and Hands:
Nervous Detachments, Legions on the Skin.
To Warn of Danger e'er it comes within.
From the keen Nerve to the numb Heel the Touch
Nor thrills the part too feebly nor too much.

SMELLING.

THE Smell dispatches Couriers to the mind
With such advice as Sight has left behind,
The Stationed Sweets, that hover round the Rose
Unseen, are yet detected by the Nose:
And yet for great Sagacity of Smell
Some Beasts the Man for keeness far excell:
An Old experienc'd Hunting Hound kept back,
Where Thousands Step, will find his Masters Track.

VII. JULY, hath XXXI Days, 1789.

WHEN the Ætherial Blue with Clouds is spread,
And dormant Lightnings hover over Head;
Soon as the Flash has launch'd the livid Flame,
It darts and burns along th' electric Train,
The dire Explosion leaves the light'ned Air,
To shine in cool Serenity and Fair.

How Nature paints her Colours! Blue and Green,
On the high Arch and ample Carpet ſeen,
Make up the Ground of Nature's won'drous Piece
Where perfect Pictures mingling interſperſe;
The golden Stars on Saphire Pavements glow
And ardent Hies adorn the Scene below,
Nor in too ſtrong Exuberance of Light
Fatigue, but pleaſe, and chear th' approving Sight.

THE temperate Man enjoys the moſt Delight,
For Riot dulls and palls the Appetite.
Exceſs ſhuts out true Reliſh from the Soul,
And does the Pleaſures ev'n of Taſte controul;
Such keen Delights from Abſtinence proceed,
That Temp'rance is true Luxury indeed.

XI. NOVEMBER, hath XXX Days, 1789.

WHEN SOL descends adown the Midnight Way,
The Atmosphere holds up the falling Day;
And so the Morn with Blushes paints the East
To entertain the rising princely Guest.
But for this kind Refraction of the Light
Sudden would flash the Day and rush the Night.

THE Atmoſphere SOL's gentle Heat retains,
Broods on the Earth in gentle Dews and Rains:
'Tis this kind Veſt that keeps our Planet warm,
Defends her numerous Progeny from Harm,
While Mountain Tops lie chill'd in Froſt and Snow.
Where Flowers and Fruits adorn their Hopes below.
